DSCI401 - Homework 8

Due: December 6th, 2024

Homework may be done in R or Python and should be submitted as an html file with links to Google colab notes if necessary. Homework should be turned in on Sakai.

1. Using the CTA datasets from the midterm, visually map each of the train stops with color for the max value of riders ever on that stop. Overly the community areas of Chicago on the map.

2. Using the IMDB database with MySQL find the top 5 actors who played themselves.
